Congress of the United States
House of Representatives
Washington, DC 20515

November 18, 2026

The Honorable Lee Zeldin
Administrator
Environmental Protection Agency
1200 Pennsylvania Avenue NW
Washington, D.C. 20004

Dear Administrator Zeldin,

As Members of the House Republican Conference, we write to emphasize the importance of the Solar for All program in promoting energy affordability, creating jobs nationwide, expanding domestic manufacturing, and strengthening American energy independence.

Republicans have long championed an all-of-the-above energy strategy to ensure that American families and businesses have access to affordable power. The Solar for All Program aligns with that approach. It was designed to help more than 900,000 households nationwide reduce their electricity bills by at least 20 percent, with many families projected to save substantially more. At a time when energy costs are rising across the country, Solar for All is capable of quickly providing meaningful relief to Americans.

In addition to energy bill savings, Solar for All advances Republican priorities to expand domestic manufacturing, strengthen supply chains, create hundreds of thousands of good-paying American jobs, and boost grid resilience. States, territories, and tribes across the country have developed robust implementation plans that incorporate workforce development and industry partnerships to deploy residential solar. Grantees are prepared to move forward with these plans and put Solar for All dollars to work for the American people.

Congress fully appropriated and obligated $7 billion in Solar for All funding. Recently, two federal District Courts affirmed Congress's intent that the Solar for All program be fully implemented so that its widespread benefits can be realized nationwide. Reinstating this program now represents an opportunity for EPA to lower energy bills at a time when electric grids are under pressure from rising demand.

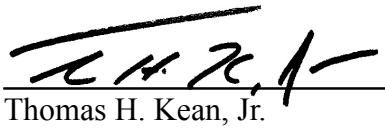

We respectfully urge EPA to swiftly reinstate the Solar for All program and ensure projects move forward to implementation as planned. Doing so will deliver meaningful savings to American families, support job creation, strengthen grid reliability, and bolster American energy dominance.

We appreciate your consideration of this request and look forward to your response.

Sincerely,

Andrew R. Garbarino
